New Signage at OACYS

First significant change in many years

Long-time customers may recall the original signs at Olson Computer Services, which were painted on sheets of plywood in blue lettering on a white background. In the earliest versions, extension panels also depicted a blocky-looking stylized computer icon.

The last of those old signs, much-faded after 30-plus years of exposure, was taken down during our office remodel last fall, which included a new main entrance, a refurbished lobby, and repairs and new finish for the building's facia.

We planned for new signage at the same time, however that project took longer than anticipated.

There were several different ideas during the design phase, which at one point featured digital signs on which we could display variable messages.

New Signage at OACYS

Continued from Page One

During the later phases, with sign design getting close to the final version, we envisioned mounting the same sign on the south face of our building as well as along Porter Road.

However, we discovered that the combined overall size exceeded City zoning limits, so we cut back to just the one large sign along Porter, plus the new pole sign, and finally the smaller lighted logo next to the main entrance.

We're very happy with the new look, which we think reflects our new energy, our new and enhanced services, and our increased commitment to the community.

We hope you like it too!

Remember!!! The new OACYS Bandwidth Prioritization System **eliminates** excess usage surcharges ... tell your friends and neighbors!

Fan Mail

"Thank you for your professionalism and outstanding techs. Your crew was gracious and very knowledgeable. They did a great job installing and helping us get on line. I know we made the right choice and will be sending more customers your way! Thanks again." -D&JAC

Tired of satellite or Clearwire? You're not alone ... many of our new OCS accounts are customers switching from satellite, DSL, Clear[wire] and others.
